

## Notification regarding COVID-19 infection

The Spiber Group (which comprises the Japan-based Spiber Inc., Spiber (Thailand) Ltd., Spiber Holdings America Inc., and Spiber America LLC) has confirmed that one of our team members has contracted COVID-19.

Infection announced: July 30

Location: Spiber (Thailand) Ltd.

Number of infected team members: 1 person

Infection confirmed: July 24

In cooperation with local health authorities, the Spiber Group has adopted the following measures:

- Submission of all relevant reports and requests for support to said authorities
- Notification of infection status to external collaborators and site visitors
- Identification and early quarantine of team members who had close contact with the infected individual
- Lockdown of premises (for the period indicated by local health authorities)
- Implementation of PCR tests for all team members working at the Thailand location

Moving forward, we intend to redouble our efforts to prevent the spread of COVID-19 by sharing relevant information with and confirming the health status of our team members and any on-site contractors. We will also make public announcements concerning any further developments and our response to these developments as necessary.
