

Quality Assurance (QA) Expert

Job description

- Establish and implement Quality Management System (QMS, also known as ISO 9001) to ensure appropriate quality assurance activities
- Define proper QMS, clarify the current company situation, and support required actions to ensure the implementation of a concrete quality assurance system
- Review and maintain documents for the management of company-wide QMS
- Support and manage other teams' QMS documentation
- Conduct internal audits to control/ensure QMS
- Support teams working on raw material procurement, production, and quality control process to meet the defined quality standards based on QMS
- Utilize strong understanding of biochemical processes and quality requirements to ensure consistent quality across different batches of final product, and develop standardization protocols and documentation
- Facilitate and manage change control/deviation control system
- Conduct root cause analyses and ensure appropriate corrective and preventive actions are taken in an effective and timely manner
- Other duties that may be assigned as deemed appropriate by management

Job experience

- Minimum 5 years of experience in QC and QA activities in the pharmaceutical, biochemical, or food industry
- Minimum 5 years of experience in biomaterial quality control or biomaterial production process
- Experienced in Quality Management System (QMS) establishment and implementation according to the requirements of ISO 9001

Core values

- A sense of engagement and responsibility towards Spiber's projects
- The ability to commit to the team's mission over individual interests
- The capacity for flexibility in the pursuit of maximizing the team's performance
- Willingness to step outside individual areas of specialization

- An appreciation for new experiences and challenges
- Ability to deliver and share our company's culture and image
- Ability to work under pressure and react to an ever-changing environment

Requirements

- Bachelor's degree or higher in biochemistry, biotechnology, microbiology, food science, or any other related field
- Basic biochemistry analysis knowledge and related analytical equipment skills
- Knowledge related to the analysis and handling of biomaterials
- Experience or knowledge related to systematic work (5S, 4M [work standardization], ISO 9001)
- English proficiency (business level equivalent to TOEIC score of 650 or higher)
- Must hold a driving license (no car or bus service available)

Preferred experience/skills

- Experience in operations based on SOP documents and other Quality Management System-related documents
- Experience maintaining policy, standards, SOP, and other Quality Management System documents
- Strong communication and documentation skills, detail oriented, able to meet deadlines
- Strong cooperative and interpersonal skills with team members and other teams
- Analytical thinking and problem solving skills
- General biochemistry knowledge/skills
