

Spiber (Thailand) Ltd.

QC Operator

Job description

- Review and ensure the quality of procured raw materials through analytical methods
- Support quality control lab analyses of finished protein products to meet quality standards (operation instructions will be based on clear SOP documents)
- Prepare analytical test reports, report to leader about analytical results, and consult and cooperate with leader to solve problems
- Manage daily expendable materials and analytical equipment that is required in the lab
- Perform daily calibration of laboratory equipment based on SOP, and cooperate with leader and outsourcing companies to perform preventive maintenance
- Cooperate with leader on other topics and issues to solve problems
- Understand and obey the Quality Management System (ISO9001)
- Other duties that may be assigned as deemed appropriate by management

Job experience

- Minimum 2 years of experience in QC activities in the pharmaceutical, biochemical, chemical, or food industry

Core values

- A sense of engagement and responsibility towards Spiber's projects
- The ability to commit to the team's mission over individual interests
- The capacity for flexibility in the pursuit of maximizing the team's performance
- Willingness to step outside individual areas of specialization
- An appreciation for new experiences and challenges
- Ability to deliver and share our company's culture and image

Requirements

- Bachelor's degree or higher in biochemistry, biotechnology, microbiology, food science, chemical sciences, or any other related field

- Basic chemistry analysis knowledge and related analytical equipment skills
- Knowledge related to the analysis and handling of biomaterials
- Experience or knowledge related to systematic work (5S, 4M [work standardization], ISO 9001)
- English proficiency (business level equivalent to TOEIC score of 650 or higher)
- Must hold a driving license (no car or bus service available)

Preferred experience/skills

- Experience in writing SOP documents and other ISO9001-related documents
- Experience in training other members
- Knowledge/skills with laboratory instruments
- Experience in applications related to analytical instruments (e.g. HPLC, extraction methods, quantification methods)
