Enquiry #4 “Chance Encounters” and Spring Summer 23 Release

Goldwin 0 have announced their release date for their upcoming Spring/Summer 2023 Collection - launching on the 24th of March 2023.

This second collection will continue to push forward with the innovative techniques introduced in their Fall/Winter 2022 offering, with the return of Spiber’s Brewed Protein™ fibers, Pertex and 3D WHOLEGARMENT technology. The message of circularity is present in the collection, as the Goldwin 0 team continue to strive towards a symbiotic relationship with the natural environment.

Standout new additions to the collection are the Back-Pack Vest, made of conjugated fiber, with utilitarian panelling and a back pocket which opens up and allows the wearer to store essentials at the small of their back. New Pertex Shieldair caps compliment any outfit perfectly, designed for ultimate wearability and comfort during runs, cycles or long hikes. Paper optical knit t-shirts and shorts, that are super light, dexterous and quick-drying. Spiber’s Brewed Protein™ fibers have been used to create denim jackets and jeans, with angular panels and cargo pockets to hold essential items. These two pieces encapsulate Goldwin 0’s mission statement, as Brewed Protein fibers are made from plant-derived sugars as primary raw ingredients and manufactured using Spiber’s proprietary fermentation process. Brewed Protein™ fibers have enormous potential to expand the range of circular materials, as they can be broken down at the end-of-use phase into nutrients and used as feedstock for fermentation and production of new Brewed Protein™ materials and other products. This is the first time that denim garments have been developed using these novel fibers, an achievement that represents an important step forward in building a sustainable future. The denim jacket and jeans will launch with the Spring/Summer ‘23 collection and will be exclusively available at Goldwin retail and online stores from March 24.

The new visual-audio campaign, Enquiry #4 “Chance Encounters” offers a beautiful introspective of the relationship between the human eye and nature. Viewed through the lens of foraging, in mountainous forests in Japan - the film perfectly captures the inspirational elements behind the design of the collection.

The official teaser for Enquiry #4 “Chance Encounters” will be released soon, via the Goldwin 0 website and social media platforms.
